As it is right now, waste of money, its only working with xbox controller. i think its so derp to play on pc and ps4 controller mby it should be fix? the game could be very funny 2 play with friends (if it worked like it should=. Its a little buggy but it's super fun. If you see this game on sale and have a friend or two to shoot at, GET IT!. This game is pretty great for couch coop action. Theres not many games like this which make it so great so I would reccomend this game. Devs add more guns and characters or let us cutomize weapons or our own character. You have pretty decent maps. Littke bit of bugs I encountered but nothing major. Devs don't give up obn this game its so fun. Also add more bots and Multiplayer. You still got along time to go. Thanks. Quick and instant fun, specially for a couple games with friends.

It's a simple shooting game, with enough chaos and variety to have fun for a couple of minutes.

It gets boring fast in one sitting, lasting for about 15 to 30 minutes. But every now and then, firing up this game with a couple of friends guarantees a couple of laughs and competitive play.

It is pricey for what it delivers, so definetly wait for a good discout before you buy it.

TL;DR - Fun and quick but don't get it at full price.. Quick and instant fun, specially for a couple games with friends.

It's a pretty solid couch co op game and the variety of modes keeps every round interesting. The current price for what the game offers does feel a tad high, but it's still a very solid pick up and play experience. There are some bugs with spawning..
