About This Game

Win That War! is a massive scale real-time strategy game, putting thousands of players at the heart of a single campaign of fierce galactic conquest. Discover new planets. Develop your arsenal. Strive to be the best to extend the domination of your corporation.

Year 1023 of the Galactic Era, bold explorers discover a new planetary system. The presence of extremely rare resources on these untapped stars is quickly confirmed, immediately prompting the greatest economic powers of the Galaxy to dispatch their envoys in order to take control.

The heart of the Win That War! experience lies in a massively multiplayer online campaign, in which opposing factions wage merciless war to conquer territories at planetary scale. You start as a low-ranking, underachieving employee in a major corporation trying to expand its industrial empire. As of now, nearly all industrial production means in the galaxy are owned by those three economical super-powers with divergent goals, serving incompatible ideals.

You're now one of them:

- Collect intelligence to prepare your strategy,
- Earn and trade resources to enrich yourself and develop your upgrade tree,
- Defeat your enemy and expand the domination of your faction over the entire planet,
- Switch to the next planet!

<https://www.youtube.com/watch?v=0r1Lh9tLLYg>. That was short... but what I did find in this game was picture of Rick Ross was a top secret file, no lie.. By far the best hidden object game I've ever played. It was like playing a movie. The story was really well developed, unlike most other games like this, which don't really focus too hard on giving a really good story most of the time. The ending was well done too- it tied everything together, and wasn't insanely abrupt like others that I have seen. Yeah lol I don't know- I obviously really enjoyed it, so I would fully recommend. It's a bit too easy, impossible to die

[worth it if you like ahogao. Fun!](#)

[So you don't manually do a burnout, big deal. The manual staging provides variance for your start timing, so that makes setup interesting. I don't understand all the hate for this DLC, it's fun if you like drag racing.](#)

Selection is terrible, mechanics get stale and repetitious and there's a lot of boring downtime between bosses. Feels like a game still in alpha.. Door To Door is an atmospheric detective story that artfully combines metropolitan architecture and surreal soundscapes with a unique blend of comedy and suspense-horror all in one stunning Sci-Fi labyrinth...

The Lounge District is a magnificent achievement in open world game design and a must-have for independent RPG fans.

2014 Ministry of Mottos. This game is definitely not the best Hidden Object game, but it was still okay. The worst part was the beginning, it was really strange and you just bumped into it. The story in general was good and there were also very difficult puzzles to solve. Also the graphics were cool and there was a gloomy atmosphere. The ending was too short but still okay. I wouldn't buy the game at full price because it isn't that worth, but when there is a sale, then you can buy it without hesitation.. Its very good, All it need a minigun. A fun mixture between twin stick shooters and clicker games. I highly suggest using a controller though.. Sanctum 2: Ruins of Brightholme, out of all the DLC packs, I liked the maps and general atmosphere of this DLC the most. The maps and weapons all seem grittier and more down to earth and I really enjoy playing them.. I am going to rate this up because I love the concept. Still buggy as hell and frustrating, but I like the direction it is going.
